Built in 1943, this long, rectangular structure contains 3523 square feet and erected at a cost of \$6,000. It is of "Mobilization," "Semi-Permanent" construction. The building is located between buildings 2626 and 2638 and has its gable ends facing north and south.

Building 2631 measures 25 feet by 138 feet with a 7-foot-by-10-foot-5-inch offset along the east wall. The building has a concrete foundation, wood wall framing with drop-lap siding, and a gabled roof with composition shingles. All but the south elevation have 8/8 windows. The south side has a new metal-framed, glass door assembly. Along the roof ridge are four attic vents, some of which are boarded up. Interior amenities include restrooms, a kitchen, fountain, 250 gallon hot water tank and radiators. The building appears to have been maintained and looks to be in good structural condition.
